SUMMARY

Software Developer with strong Data Structures & Algorithms skills and 400+ problems solved across competitive programming platforms. Hands-on experience building backend applications and REST APIs using Node.js and Express, with experience in modular development, debugging, deployment, and end-to-end feature implementation.

EDUCATION

Harcourt Butler Technical University, Kanpur

Bachelor of Technology in Electronics Engineering

CGPA: 7.78

(2023 – 2027)

TECHNICAL SKILLS

- **Languages:** C++, JavaScript, Python
- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems
- **Backend/Web:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** MongoDB, SQL
- **Tools:** Git/GitHub, Linux, Postman, VS Code
- **Core Skills:** Problem Solving, Debugging, Troubleshooting, Error Handling

EXPERIENCE

NIVARO Health Technologies Pvt. Ltd.

Software Development Engineer Intern

Certificate [↗](#)

July 2026

- Integrated backend APIs and Firebase services including **Authentication, Firestore, and Cloud Storage** to support application data management.
- Developed responsive UI components and performed testing and debugging to identify and resolve issues, improving application usability and stability.
- Collaborated with the development team using **Git/GitHub** on data modeling, feature integration, testing, and deployment workflows in a team-based development environment.

Banaras Locomotive Works (BLW), Indian Railways, Varanasi

Industrial Training Trainee

Certificate [↗](#)

June 2026

- Completed industrial training across the **Maintenance & Service, Loco Testing, Engine Test, and Traction Assembly** shops, gaining exposure to systematic troubleshooting, testing procedures, and quality control processes.
- Interacted with engineers and documented production workflows and testing procedures in a technical report, reinforcing technical communication and process-documentation skills.

PROJECTS

SplitSmart | Node.js, Express, MongoDB, Mongoose, JWT

GitHub [↗](#)

- Designed and implemented a Splitwise-style expense-splitting REST API using a layered MVC architecture separating routes, controllers, and data models.
- Modeled User, Group, and Expense entities with Mongoose, applying object-oriented schema design to support group-based expense tracking and balance computation.
- Implemented JWT-based authentication and route-level authorization middleware to enforce access control on protected endpoints.
- Added structured request validation and centralized error handling across all API routes to improve reliability against malformed input.

Letshire - AI Assistant | Python, FastAPI, React, Groq LLM API, Pydantic

GitHub [↗](#) | Live [↗](#)

- Engineered a FastAPI backend with schema-validated endpoints (Pydantic) powering an AI recruiter chat assistant, and deployed the app to production.
- Developed a resume-parsing module that converts unstructured PDF resumes into structured JSON, handling inconsistent formatting and malformed input.

ACHIEVEMENTS

- Solved **400+ coding problems** on LeetCode, Codeforces, and CodeChef, building strong analytical and logical problem-solving skills Codolio [↗](#)
- Achieved **LeetCode rating of 1439** (Max.) and **Codeforces rating of 816** (Max.)
- Secured a competitive **branch change to Electronics Engineering** through strong first-year academic performance.
- Ranked **2nd (university round)** in **Smart India Hackathon 2025** – built a web-based portal for the PM Internship Scheme with internship listing, search, and application tracking using **React + Flask** Certificate [↗](#)

CERTIFICATIONS

- **Machine Learning Specialization** – Coursera, DeepLearning.AI & Stanford University
- **System Design Masterclass** – Udemy
