SUMMARY

Electronics Engineering student with a strong foundation in Data Structures & Algorithms and hands-on experience building backend services and REST APIs in Python, C++, and JavaScript. Experienced in developing and deploying AI/ML and GenAI-based applications, including RAG pipelines and LLM-integrated systems, alongside core software development and debugging work.

EDUCATION

Harcourt Butler Technical University, Kanpur
Bachelor of Technology in Electronics Engineering

CGPA: 7.78
(2023 – 2027)

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript, SQL
- **Software Engineering & Backend:** Data Structures & Algorithms, REST APIs, FastAPI, Node.js, Git, GitHub
- **AI/ML:** Machine Learning Fundamentals, NLP Fundamentals, LLMs, RAG, Embeddings, Semantic Search, LangChain, LangGraph, Prompt Engineering
- **Databases:** MongoDB, MySQL
- **CS Fundamentals:** OOPs, DBMS, Operating Systems, Computer Networks, System Design
- **Tools & Platforms:** Linux, VS Code, Streamlit, Vercel, Render, Groq API, OpenAI API, Gemini API

EXPERIENCE

NIVARO Health Technologies Pvt. Ltd.
Software Development Engineer Intern

July 2026
Certificate [↗](#)

- Integrated backend APIs and Firebase services – Authentication, Firestore, and Cloud Storage – for application-level data management and access control.
- Debugged and resolved issues surfaced during internal testing, improving application usability and stability across UI components.
- Collaborated with the development team using **Git/GitHub** on data modeling, feature integration, and deployment workflows in an agile environment.

PROJECTS

LangGraph RAG Chatbot | Python, LangGraph, LangChain, Groq, FAISS, Streamlit [GitHub](#) [↗](#) | [Live](#) [↗](#)

- Built an end-to-end Python application for contextual PDF Q&A, handling document ingestion, recursive text chunking, and embedding generation for structured retrieval.
- Implemented semantic search over indexed documents using FAISS similarity search, with thread-specific indexing to isolate context across concurrent sessions.
- Designed a LangGraph-based application workflow with tool-calling architecture, integrating external APIs for web search, calculation, and stock-price retrieval.
- Deployed an interactive Streamlit interface with multi-threaded chat history and SQLite-backed persistence for stateful, production-accessible usage.

Letshire - AI Assistant | Python, FastAPI, React, Groq LLM API, Pydantic [GitHub](#) [↗](#) | [Live](#) [↗](#)

- Designed and built REST APIs with **FastAPI** for resume processing and candidate-query workflows, with a decoupled React frontend consuming the backend services.
- Built a document parser that converts unstructured PDF resumes into structured, schema-validated JSON using **Pydantic**, enabling reliable downstream data processing.
- Integrated the Groq LLM API into the backend to power resume-grounded candidate queries, with input/output validation enforced via Pydantic schemas.
- Deployed the FastAPI backend on Render and the React frontend on Vercel, delivering a publicly accessible full-stack application.

ACHIEVEMENTS

- Solved **400+ algorithmic problems** across LeetCode, Codeforces, and CodeChef, reflecting strong Data Structures & Algorithms fundamentals [Codolio](#) [↗](#)
- Achieved a maximum **LeetCode rating of 1439** and **Codeforces rating of 816**.
- Ranked **2nd in the university round of Smart India Hackathon 2025** for developing a web-based portal for the PM Internship Scheme. [Certificate](#) [↗](#)
- Achieved **branch change to Electronics Engineering** at HBTU Kanpur based on first-year academic performance.

CERTIFICATIONS

- **Machine Learning Specialization** – DeepLearning.AI & Stanford University (Coursera) [Certificate](#) [↗](#)
- **System Design Masterclass** – Udemy [Certificate](#) [↗](#)
