EDUCATION

Harcourt Butler Technical University, Kanpur

Bachelor of Technology in Electronics Engineering

CGPA: 7.78

2023 – 2027

Central Hindu Boys School, BHU, Varanasi

Class XII

75.2%

2021

Raj English School, Varanasi

Class X

96.2%

2019

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript
- **Data Structures & Algorithms:** Arrays, Graphs, Dynamic Programming, Trees, Sliding Window, Binary Search
- **Computer Science Fundamentals:** Object-Oriented Programming, DBMS, Operating Systems, System Design Fundamentals
- **Backend & Web:** Node.js, Express.js, REST API Design, MongoDB, Mongoose, JWT, Firebase
- **Tools/Platforms:** Git, Linux, Postman, VS Code
- **Machine Learning:** Scikit-learn, Pandas, NumPy, LLM APIs (OpenAI, Gemini), Streamlit

EXPERIENCE

NIVARO Health Technologies Pvt. Ltd.

Certificate ↗

Software Development Engineer (SDE) Intern – July 2026

- Integrated backend APIs and Firebase services – **Authentication, Firestore, and Cloud Storage** – for application data management on a healthcare technology platform.
- Built responsive UI components and resolved defects identified through internal testing, improving application stability and usability.
- Collaborated via **Git/GitHub** on Firestore data modeling and deployment workflows within an agile, team-based development environment.

PROJECTS

Letshire - AI Assistant | Python, FastAPI, React, Groq LLM API, Pydantic

GitHub ↗ | Live ↗

- Built an AI recruiter chat assistant using Python, FastAPI, React, Groq LLM API, and Pydantic, enabling recruiters to query candidate resumes while restricting responses to resume-grounded information.
- Developed an LLM-powered resume parser that converts unstructured PDF resumes into schema-validated JSON profiles covering skills, experience, and projects, handling inconsistent formatting.
- Deployed the FastAPI backend on Render and React frontend on Vercel, with startup-time resume parsing, persistent chat history, CORS configuration, and reduced LLM API calls per conversation.

SplitSmart | Node.js, Express, MongoDB, Mongoose, JWT

GitHub ↗

- Designed and built a Splitwise-style expense-splitting REST API in Node.js/Express using a layered MVC architecture separating routes, controllers, and data models.
- Modeled User, Group, and Expense entities with Mongoose, applying object-oriented schema design to support group-based expense tracking and balance computation.
- Implemented JWT-based authentication and route-level authorization middleware to enforce access control on protected endpoints.
- Added structured request validation and centralized error handling across all API routes to improve reliability against malformed input.

ACHIEVEMENTS

- Solved **400+ algorithmic problems** across LeetCode, Codeforces, and CodeChef, with focus on graphs, dynamic programming, and array/string algorithms. Codolio ↗
- Achieved **LeetCode rating of 1439** (Max.) and **Codeforces rating of 816** (Max.)
- Ranked **2nd (university round)** in **Smart India Hackathon 2025** – built a web-based portal for the PM Internship Scheme with internship listing, search, and application tracking using **React + Flask**. Certificate ↗

CERTIFICATIONS

- **Machine Learning Specialization** – DeepLearning.AI & Stanford University
- **System Design Masterclass** – Udemy

Certificate ↗
