SUMMARY

Electronics Engineering undergraduate at HBTU Kanpur with hands-on industrial exposure at Banaras Locomotive Works and a demonstrated record of academic and personal improvement. Experienced in practical engineering environments, technical problem-solving, teamwork, and communicating technical work. Seeking to begin a full-time engineering career where I can apply my skills, take responsibility, and continue learning through practical work.

EDUCATION

Harcourt Butler Technical University, Kanpur <i>Bachelor of Technology in Electronics Engineering</i>	CGPA: 7.78 <i>(2023 – 2027)</i>
Central Hindu Boys School, BHU, Varanasi <i>Class XII</i>	75.2% <i>(2021)</i>
Raj English School, Varanasi <i>Class X</i>	96.2% <i>(2019)</i>

EXPERIENCE

Banaras Locomotive Works (BLW), Varanasi, Indian Railways <i>Industrial Training Trainee – June 2026</i>	<u>Certificate</u> ↗
- Completed hands-on training across four production shops, learning how locomotives are manufactured, tested, and maintained in an industrial environment. - Observed electrical testing and assembly processes for WAP-7 and WAG-9HC locomotives, with emphasis on safety and quality procedures. - Interacted with engineers and technical teams to understand production workflows, maintenance practices, and coordination across different departments. - Prepared and presented a technical report on locomotive production, electrical systems, industrial safety, and quality-control practices, gaining practical exposure to engineering work in a large industrial organization.	

PROJECTS

Letshire - AI Assistant Python, FastAPI, React, Groq LLM API, Pydantic	<u>GitHub</u> ↗ <u>Live</u> ↗
- Built a full-stack AI assistant that accepts user input and uses an LLM to generate useful responses and perform data-processing tasks. - Developed backend APIs using Python and FastAPI, with Pydantic used to validate input and output data. - Connected the React frontend with the backend and deployed the application for real-world use.	

TECHNICAL SKILLS

- **Programming:** C++, Python, JavaScript, Data Structures & Algorithms, Object-Oriented Programming
- **Engineering Fundamentals:** DBMS, Operating Systems, Basic Computer Networks
- **Tools & Technologies:** Git, Linux, MongoDB, FastAPI, React, Node.js, REST APIs
- **Data & AI:** NumPy, Pandas, Scikit-learn, LLM APIs

ACHIEVEMENTS & PERSONAL GROWTH

- Improved academic performance during the first year at HBTU Kanpur and earned a **branch change to Electronics Engineering**, demonstrating persistence and disciplined effort toward an engineering career.
- Solved **400+ algorithmic problems** across competitive programming platforms including LeetCode and Codeforces, **Codolio** [↗](#) strengthening problem-solving and algorithmic thinking.
- Collaborated in a **4-member team** at **Smart India Hackathon 2025**, contributing to the development and **Certificate** [↗](#) presentation of a platform prototype under a strict deadline.

CERTIFICATIONS

- **Machine Learning Specialization** – DeepLearning.AI & Stanford University **Certificate** [↗](#)
- **System Design Masterclass** – Udemy **Certificate** [↗](#)
